

DINH KHOI

Solution Architect | Full Stack Engineer

+84 876543 435 | dinhkhoi.le1996@gmail.com

PROFESSIONAL SUMMARY

- Senior full-stack developer with 10+ years of experience specializing in backend development for high-traffic e-commerce and banking sectors.
- Expert in Node.js, TypeScript, Java, and microservices architecture.
- Proven track record delivering scalable solutions for enterprise clients including National Australia Bank and major cryptocurrency exchanges.
- Strong leadership experience mentoring teams and architecting systems supporting millions of users with thousands of concurrent connections per second.

TECHNICAL LEADERSHIP & RECOGNITION

- Successfully delivered 50+ enterprise applications across banking and e-commerce domains
- Led development teams of 15+ members in international environments
- Architected critical applications within banking Home Ownership domain
- Established best practices for microservices architecture and DevOps workflows
- AWS Certified Solutions Architect and Kubernetes Certified professional.

CORE TECHNICAL SKILLS

Backend Development:

- Node.js & TypeScript - Expert level, microservices architecture
- Java (Spring Boot, Quarkus) - Enterprise application development
- PHP (Laravel, Magento) - E-commerce platform development
- Python - API development and automation
- C# (Unity, .NET Core) - Cross-platform development

Database & Infrastructure:

- PostgreSQL, MySQL - Advanced database design and optimization
- MongoDB, Redis - NoSQL and caching solutions
- Elastic Search - Search and analytics implementation
- AWS Services - Lambda, RDS, S3, Cognito, CloudWatch
- Kubernetes, Docker - Container orchestration and deployment

DevOps & Architecture:

- Microservices Architecture - Design and implementation
- CI/CD - Jenkins, Harness, Terraform, GitLab
- Monitoring - Splunk, OpenSearch, Fluent Bit, Sentry
- System Design - High-availability, scalable architectures
- Security - JWT, OAuth, encryption, OWASP best practices

Frontend Technologies:

- JavaScript/TypeScript, React, Angular, Next.js
- React Native, Electron - Mobile and desktop applications
- Redux, RxJS - State management and reactive programming

EDUCATION

Academy of Finance, Securities Specialization

Focus: Financial markets, investment analysis, securities trading, and portfolio management

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AWS Certified:** Cloud Solutions Architecture and Development
- **Harness Certified:** Continuous Delivery and DevOps Platform
- **Kubernetes (K8S) Certified:** Container Orchestration and Management
- **Terraform Certified:** Infrastructure as Code and Cloud Automation

PROJECTS

Enterprise Banking Platform Development

Aug 2022 – Sept 2026

Technical Leader | Banking & Finance Domain

- Led development team of 15 members contributing to one of Australia's top 3 largest banks, driving technical excellence and innovation within the Home Ownership domain
- Architected and built critical applications enhancing customer experience and business capabilities for home loan processing and mortgage management systems
- Established best practices for high-quality software delivery and mentored engineers on microservices architecture and DevOps workflows
- Implemented enterprise-grade security and compliance standards for banking applications handling sensitive financial data

Achievement: Successfully delivered mission-critical banking applications with 99.9% uptime and zero security incidents

Technology Stack: Node.js, AWS, Redis, WebSocket, PostgreSQL, Java, React, Kubernetes, Splunk, OpenSearch, RabbitMQ, Jenkins, Harness, Terraform.

F&B Chain Management Platform

Jan 2019 – June 2022

Solution Architect | Retail & E-commerce Domain

- Consulted for Vietnam's largest F&B and restaurant chain, operating nearly 500 locations and major brands like The Coffee House, serving millions of customers
- Led cross-functional engineering team providing technical leadership for retail operations, inventory management, and customer engagement systems
- Provided technical solutions for systems supporting millions of users and thousands of concurrent connections per second including POS integration, order management, and customer loyalty programs
- Architected scalable solutions for retail operations enhancing performance and user experience across multiple restaurant brands

Achievement: Delivered high-performance systems serving millions of users with 99.95% availability

Technology Stack: PostgreSQL, MongoDB, React.js, Magento e-commerce platform, Angular, Node.js, React Native.

Global Cryptocurrency Exchange Platform

June 2019 – Dec 2020

Full Stack Developer | Fintech & Trading Domain

- Contributed to a leading global cryptocurrency exchange, operating in a complex, high-stakes enterprise environment serving millions of traders worldwide
- Developed and maintained high-throughput APIs using Python and Java, providing critical, real-time data for core cryptocurrency trading services including order matching, portfolio management, and transaction processing
- Built micro frontend mini-apps for internal use, integrating with complex infrastructure and complete workflows including testing and monitoring systems
- Optimized deployments in high-scale setup to ensure reliability and efficiency for real-time trading operations handling millions of transactions per day

Achievement: Maintained 99.99% uptime for critical trading APIs handling millions of transactions daily

Technology Stack: Python, Java, Kubernetes, Docker, Harness, React, Splunk, OpenSearch.

Enterprise E-commerce Solutions Development

Sept 2015 – June 2019

Full Stack Developer & Technical Lead | E-commerce Domain

- Worked for Asia's leading Adobe Partner, specializing in delivering enterprise-level Magento e-commerce solutions for global retail clients
- Acted as technical lead, architecting and delivering end-to-end e-commerce solutions for enterprise clients on the Magento 2 platform
- Designed and implemented comprehensive retail ecosystem, integrating third-party services such as payment gateways, shipping solutions, and Point-of-Sale systems
- Led development team in building highly customized, real-time applications and interactive frontends using Angular to enhance customer engagement

Achievement: Delivered 20+ enterprise e-commerce solutions with 95% client satisfaction rate

Technology Stack: Magento 2, Angular, PHP, MySQL, Redis, real-time applications.

Enterprise Banking E-Statement System

Banking & Finance Domain

Full Stack Developer | Enterprise Financial Platform

Description: Developed comprehensive microservices system for both personal and enterprise banking customers, enabling digital transformation of traditional banking document management

My Responsibilities:

- Built secure e-statement registration system with multi-email notifications (daily/monthly), supporting complex business logic for balance notifications, debt management, and financial document delivery
- Implemented advanced UI features including pagination, search functionality, multi-column filtering, PDF generation, printing capabilities, and bulk operations for enterprise banking needs
- Integrated SOAP services for secure PDF content retrieval, implemented enterprise security requirements including token-based authentication, OTP verification, and password confirmation
- Deployed using GitLab CI/CD with Rancher Kubernetes, comprehensive health monitoring, and automated scaling for high-volume banking operations

Achievement: Delivered mission-critical banking application with zero security incidents, 99.9% uptime, and successful handling of millions of banking documents

Technology Stack: Nest.js, TypeORM, React, Redux Saga, Kubernetes, PostgreSQL, GitLab CI/CD, Rancher.

PERSONAL PROJECTS

Advanced Banking & E-commerce Solutions

- Complete microservices platform with advanced features including real-time processing, user management, and payment integration
- High-performance APIs supporting 10,000+ concurrent users with sub-second response times
- Enterprise-grade security implementation with encryption and compliance standards
- Performance optimization achieving 50% reduction in response times and 99.9% availability

Technology: Node.js, TypeScript, PostgreSQL, AWS, Kubernetes, Docker, Redis
